

THE CHINOOK ADVANCE

Vol. 22

Chinook, Alberta. Thursday, SEPTEMBER 27th 1945

The Chinook School Board and also the pupils and residents of the village, are very much pleased to have the opportunity to welcome Pilot Officer Charyk back as Principal of the Chinook Consolidated School, after an absence of two years.

Mr. Art. Campbell of Patricia arrived here on Tuesday morning to spend a few days renewing old acquaintances.

Mrs. W. Milligan returned Tuesday morning after having visited for a month with her two daughters in Victoria.

Mrs. Nicholson spent a few days in Calgary over the week end.

Cpl. S. A. R. Gustin and Mrs. Gustin and son left on Wednesday morning for Vancouver, after spending the past week with Mrs. Jacobson. Cpl. Gustin returning only recently from Italy.

WE'LL JUST HAVE TO TAKE A SMALLER SLICE

By COLLINS

CANADIAN RED CROSS
Give to the utmost...now!

"Here comes our cheque Mummy!"

All over Canada, in cities, towns, villages and on farms, hundreds of thousands of men and women watch for the postman to bring dependents' allowance cheques as other people look for pay-day. They are people of all ages whose breadwinners are away on active service. They include returned men not yet back in civil life.

And soon there will be hundreds of thousands more back from the war. They will receive cheques to help them buy civilian clothes, to go to college, to get technical or vocational training, to start in business for themselves, or to set up as farmers or fishermen.

The banks have to be prepared to cash all official cheques for these and a dozen other purposes—and to do so anywhere in Canada without charge. In fact, the banks supply Canada with the nationwide machinery to facilitate a grateful country's plans for restoring service men and women to civilian life.

This is a tremendous task. It will entail a vast amount of bookkeeping. But you can be sure that your banks will take it in their stride without impairing regular banking service.

Miscellaneous Shower

A Miscellaneous Shower was held in the Ball room of the Hotel on Wednesday evening Sept. 26th, in honor of Miss Bernice Peterson whose marriage will take place in the near future.

The evening was spent in playing games, after which a fine lunch was served.

A basket trimmed in pink and white filled with many beautiful and useful gifts was opened by the bride-to-be. Then all formed a circle sing. "For She's A Jolly Good Fellow.

The shower was sponsored by the Girls Club.

THANKS

We wish to thank all our very kind friends in Chinook and district for the wonderful enjoyment they provided at a farewell party held at our home, the night prior to departing for Strathmore, where we will take up residence in connection with the operation of the U. F. A. Co-op Store. Our Sincere good wishes to you all.

Mr. and Mrs. Frank Stollery

Wheat In Canada

WESTERN CANADA has long been famous for the production of a large share of the world's finest wheat. The first crops were sown by the Selkirk settlers, who came here from Scotland via Hudson Bay and York Factory in 1814 to colonize a land secured by Lord Selkirk from the Hudson's Bay Company. As the West was settled and transportation facilities were developed the annual wheat crop increased steadily. In the year 1849 it was estimated that 6,000 acres were sown in wheat. By 1880 the crop amounted to over 32,000,000 bushels annually, and these figures continued to rise until the present time, when they have reached the hundreds of millions. The soil and climate of Western Canada are favourable for growing the finest quality of wheat in the world, but there have been obstacles to overcome in the form of rust, insects, frost and numerous other difficulties.

Obstacles Have Been Overcome

These, and other factors which have interfered with the success of wheat growing here have been eliminated or overcome through the efforts of farmers and others interested in the future of agriculture. Outstanding among the contributions which have been made to the success of this work are the findings of Dr. Wm. Saunders, the first Director of the Dominion Government Experimental Station at Ottawa, and his two sons, C. E. and A. P. Saunders. Through their efforts Marquis wheat was developed, and this early-maturing variety, which is ready for harvest before the early frosts have been widely used since it was introduced in 1909. This and many other discoveries have helped to make the wheat crop from the Prairie Provinces one of the foremost Canadian industries and an important factor in world food supplies both in peace and war.

More Acreage Now in Wheat

During the past few years, farmers on the Prairies have been encouraged to produce hog rather than wheat, to meet the needs of Britain and other countries whose normal sources of supply had been cut off because of the war. Hog production was sharply increased to enable Canada to meet her commitments for foreign markets, but recent figures issued by the Dominion Government show that the Western farmers are now returning to wheat, their surest and most satisfactory crop. In Saskatchewan the acreage sown in wheat this year was three per cent. higher than in 1944, and in Alberta it was increased by a little more than one per cent. In Manitoba there was no increase in the amount of wheat which was planted, but the acreage sown in other grain crops was higher. In all three provinces hog production showed a marked decline. Nutritionalists and others concerned with world food supplies at the present time do not view with concern these indications that wheat is once more to be Western Canada's largest crop, for they are of the opinion that during the next few years there will be need for all the wheat which can be produced to meet the world's food requirements.

The Wool Clip

Western Canada Shows Marked Improvement This Year

According to the first reports, the 1955 domestic clip of Western Canada shows a marked improvement over 1944 in the preparation of individual fleeces, states the Current Review of Agricultural Conditions in Canada. The Bright grades come mostly from British Columbia and Manitoba, where more favourable conditions of moisture played a major role. Saskatchewan and Alberta domestic wools appear to run more to the semi-Bright grades because of greater earth content and consequent lower yield. However, after scouring, the actual fibre is comparable with the Bright fibre.

Eastern domestic wools will probably grade better than in 1944, with a somewhat lighter shrinkage, says the Review.

The total weight of fleece wool graded in registered wool warehouses in 1944 amounted to 10,553,243 lbs., an increase of 167,641 lbs. over 1943.

GEMS OF THOUGHT

FORTITUDE

Fortitude I take to be the quiet possession of a man's self, and an undisturbed doing his duty whatever evils beset, or dangers lie in the way. —John Locke.

Let us have faith that right makes might, and in that faith us dare to do our duty as we understand it. —Abraham Lincoln.

Our great Way-chewer, steadfast to the end in his obedience to God's laws, discriminated for all time and peoples the supremacy of good over evil, and the superiority of Spirit over matter. —Mary Baker Eddy.

Let us not be weary in well doing: for in due season we shall reap, if we faint not. —Galatians 6:9.

There is a strength of quiet endurance as significant of courage as the most daring feats of prowess. —Henry Theodore Tuckerman.

A man may fall into a thousand perplexities, but if his heart be upright and his intelligence unclouded, he will issue from them all without dishonor. —Robert Louis Stevenson.

Price Control And Rationing Information

Q—I have just returned from overseas and am on a thirty-day leave. Ration coupons were issued to be for all rationed foods, except meat. Now that meat has been included in the list of rationed foods, will I be able to obtain coupons for meat.

A—Yes. Meat coupons will be issued to service personnel on leave by the local ration boards who received temporary ration cards prior to meat rationing. You must present your ration card when making application for these coupons.

Q—Must beef rings register with their local ration boards.

A—All beef rings must register as such with the local ration boards. All regulations controlling their operations will be given to them when they apply for registration.

Q—How often do meat coupons become valid?

A—Meat coupons will become valid every Thursday and will remain valid until otherwise declared.

Q—My husband is expected home from overseas next month. Can I get sugar for canning coupons for him so that I may put up extra preserves for the winter when he will be home?

A—Yes, if your husband is discharged and applies for a ration book before October 31st, 1945, 20 additional preserves coupons will be issued to him in his ration book.

Please send your questions or your request for the pamphlet "Consumers' News" or the Blue Book in which you keep track of your rationing, mentioning the name of this paper to the nearest Wartime Prices and Trade Board office in your province.

Showed Their Loyalty

People Of Northern Ireland Displayed Important Part In War

Today the Government of Northern Ireland continues to function, notwithstanding all the woes and devices of its enemies, and the Province has played a highly important part in the war with Germany, now victoriously concluded. Mr. Winston Churchill and other British Ministers of the Crown have paid public tributes to the services rendered by Ulster, the possession of whose harbours, apart from other considerations, has been of the utmost value to Britain in combating the submarine menace. The brutal and vicious air raids carried out over Belfast and neighbouring cities in 1941 bore witness to the Nazi recognition that Ulster areas was among the most redoubtable adversaries of Germany. The constancy and resolution of the people of the Province has remained unshaken under all the storms of adversity and their loyalty has not wavered or diminished with the passing of the years. —Belfast Telegraph.

For Eggs That Keep

Still experimental, and possibly in need of a radio waveband for operation, is a high-frequency machine for sterilizing eggs, under development at the University of California.

Since David, Calif., in principle, somewhere between radio and diathermy, the device uses oscillations that cook an egg hard in about nine minutes, but with only a ten-second exposure, the egg germ is killed, giving better keeping quality; certain bacteria on the shell are also destroyed; the egg's albumen is slightly thickened, so that what broken in the pan, the yolk stands out above it. If brought to a commercial stage, the machine probably would improve keeping quality, and appearance of eggs, and fit in with oil preservation. Experts are not ready to make claims.—Brandon Sun.

Clearing German Land Mines From Normandy And Brittany Beaches

Between six and seven million unexploded German land mines are still hidden in the fertile fields and sandy beaches of Normandy and Brittany. Since D-Day an average of 200 people, including many children, have been killed each month by German mines.

Aug. 1, only one-tenth had been removed by French workmen and German prisoners of war trained by United States sappers. The dangerous job will not be finished before 1947.—Time.

An overheated motor may be due to a loose fan belt. The belt should be examined and adjusted occasionally.

Will Be Long Job

Education tours of Germany in the area in which they are working are being offered to members of the Canadian Women's Army Corps stationed in Germany. These tours, arranged by the Canadian Army Educational Service, have been greeted with enthusiasm by the Army girls and already many off-duty hours have been spent in visiting the neighbouring countryside.

The first trip organized by the CWAC led to the quaint old town of Hameln, home of the famous Pied Piper. The lovely old stone house, once said to be occupied by the Piper, has been taken over by British troops. The next jaunt was to Porta, near Minden, where a commercial engineer from Holland conducted CWAC sight-seers through the Philips Electrical Underground Plant. Further tours have been planned.

"HEROINES OF WAR"—Captain Beatrice D. Munroe's play entitled "Heroines of War," won the award given by the Canadian Daughters' League, Regina, Sask. The award was offered for the best play written by a Saskatchewan person, preferably with a Saskatchewan locale. It dealt with army life as the girls saw it. With a cast of six CWACs, the action takes place in barracks, and might be staged in any cubicle. Captain Munroe, herself, has a very interesting career. Prior to the war she was an actress on English stage for seven years. She has also done sales promotion work in Egypt and was about to leave for India when war broke out. Immediately prior to enlisting in the Canadian Women's Army Corps she was in the West Indies. She came to Canada from there and entered the Corps in a commissioned rank. Since then she has been stationed variously in Toronto, Estero, and Regina. At present she is officer commanding No. 21 Admin. Unit, CWAC, Dundurn Military Camp, Dundurn, Sask.

An Honest Man

Stranger Returned Large Sum Which A Bank Overpaid

It happened in a bank not very far from St. Thomas.

There was a long queue at the cage and the teller was as busy as could be. Among the cheques he cashed were several for large amounts. That night when he came to balance his cash he was exactly \$1,000 short.

Next morning a man who was quite a stranger, who lived in a city some miles away, came into the bank.

"You gave me \$1,000 too much yesterday," he said. "I did not count it until I got home. I thought you would be worried about it, so I brought it back."

He was a Jew.

—St. Thomas Times-Journal.

Here a CWAC There a CWAC

MEET A CWAC—

"I'm Beginning To See The Light" should be the theme song of all Night Vision Testers according to S/Sgt. Edna Pollock of Virden, Manitoba, after her experience with this type of work in various camps. S/Sgt. (Poly) Pollock, a former school teacher at Prince Albert and Cupar, Sask., enlisted in the Canadian Women's Army Corps at Regina, Sask., in March, 1943. After receiving her basic training at Vermilion, Alta., she was posted to No. 3 Co. CWAC, Orderly Room, M.D. 12, Regina, where she was promoted to the rank of corporal and later to the rank of platoon sergeant. In Feb., 1944, S/Sgt. Pollock attended a Canadian Army Administrative Course at Kempenfelt, Ont. In July of the same year she proceeded to Toronto to take a course in Night Vision at the College of Opticianry; at the completion of which, she was posted to the Night Vision Unit at Debert Transit Camp, Nova Scotia. "My work in Night Vision was by far the most interesting, and I also feel the most useful of any work I have done during my army career," states S/Sgt. Pollock. "It was gratifying to know that we were able to help the men, who were proceeding directly overseas from Debert, and perhaps in some instances be the means of saving their lives by instructing them in how to use their night vision to the best advantage." Poly described the Night Vision Centre at Debert as consisting of two complete units with an underground tunnel, 100 ft. long, leading to the testing room. They gave lectures and tests as many as 276 men in one day. The lecture was generally given to a class of about 20 and lasted about 45 minutes, after which every man's vision was tested individually, and graded according to his ability to see in the dark. Leaving Debert in July, 1945, S/Sgt. Pollock was posted to the Night Vision Unit at Camp Shilo, Man. She is at present with No. 112 Depot Coy., CWAC, Regina, awaiting her return to civilian life.

CWAC TAKE OVER PIED PIPER'S HOME—

Education tours of Germany in the area in which they are working are being offered to members of the Canadian Women's Army Corps stationed in Germany. These tours, arranged by the Canadian Army Educational Service, have been greeted with enthusiasm by the Army girls and already many off-duty hours have been spent in visiting the neighbouring countryside.

Big Ben A Symbol

French Airman Says Chimes Gave People Comfort And Strength

The following letter appeared in the London Daily Sketch:

Sir—For countless Frenchmen who spent their years of Big Ben at Westminster will have a stirring emotional effect for many years after this European War.

I was a French airman at the time my country called for Big Ben at Westminster will have a stirring emotional effect for many years after this European War.

During those years of German occupation the chimes of Big Ben at Westminster will have a stirring emotional effect for many years after this European War.

As long as we heard them we knew that Liberty was not dead. For Europe Big Ben was the symbol of hope.

Recently I came to London. The first thing I wanted to see was Big Ben. It gave me the most moving moment of my visit.

PAUL VERDORIS.

CARING FOR GRAVES

Thirty-one mothers, residents of Malta, have pledged themselves to care for the graves of 30 Canadians who gave their lives in the defence of Malta, and who lie buried in the island fortress. The graves will be kept sodded green and planted with flowers. This was revealed by John Gormaine, vice-president of the Maltese Society of Toronto.

TOUCH OF IRONY

General MacArthur showed more than a delicate touch of irony in naming "Bataan" as the password to secure admission to the conference at Manila on terms of surrender.

Clothing Collection

For Distribution Among The Destitute People In War-Stricken Countries

The National Clothing Collection is a united effort on the part of Canadian United Allied Relief Fund, and UNRRA (United Nations Relief and Rehabilitation Administration) with the assistance of national, provincial and local organizations throughout Canada. The purpose of the Collection is to secure spare used clothing for free distribution to needy and destitute children, men and women in war-devastated Allied countries.

Throughout war-ravaged areas clothing is very scarce, or threadbare and worn out. More than 125,000,000 people in liberated European nations are in dire need. Of these more than 30,000,000 are children. Because Canada is dependent on outside sources for a very substantial portion of her requirements of yarn and fabrics, it would not be possible to manufacture in Canada more than a very insignificant part of the total clothing requirements of these people. This means that needy children, men and women in war-devastated Allied countries must depend on the help of the Canadian people through their donations of used clothing which can be spared, without replacement.

In a report on the work being done by UNRRA, President Roosevelt said on September 30th, 1944: "Millions of people do not have enough clothes to keep them warm . . . in occupied Europe almost as many people have died from exposure due to lack of adequate clothing as have died from starvation."

The Canadian public will be asked to contribute in this campaign only such serviceable used clothing as can be spared from their wardrobes without replacement.

What is needed is used clothing for both winter and summer wear. Although clothing needs of these people, repair, it must be useful to the people who will receive it. All types of washable garments should be washed before they are given to the collection, but need not be ironed. Other garments should be clean and sanitary, but need not be dry-cleaned before being contributed.

Men's, women's, children's suits; odd coats, skirts, trousers; women's dresses; women's blouses; women's scarves; men's, women's, children's underwear; men's, women's, children's shoes; men's, women's, children's socks; men's, women's, children's hats; men's, women's, children's gloves; men's, women's, children's handkerchiefs; men's, women's, children's towels; men's, women's, children's blankets.

WRAPPED AIRTIGHT TO PROTECT POTENCY—ALWAYS DEPENDABLE

OUR COMPLETE SHORT STORY—**GULLIBILITY**

—By—
JACK WOODFORD

McClure Newspaper Syndicate

They were somehow vaguely alike the enormous sea gull, and the enormous cop. The gull, which Mike called Gully, was big as an eagle—and twice as tough. The two had each other with a rich, full-bodied venom.

The bird hated Mulvaney because she was a one-man gull, apparently, and believed that the cop kept her from her master. And Mulvaney hated the bird because he had been due for advancement a year, when he'd found her, and the ship-up, the bird caused that day had cost him his promotion.

Gully, Mike figured, had also cost him a wife. Ellen Flanagan wouldn't live in the same house with a sea gull.

One of the gull's wings was broken. The bird lived on the back porch, which Mulvaney had encased in chicken wire. Taking Gully out and putting her into the special box Mike had made for her was some job. He had to wear thick gloves and a baseball catcher's mask to accomplish it.

On a Saturday night when Mulvaney had about given up hope, what he had been waiting for so long happened.

He'd taken the gull in her box out to a gambling joint in Oak Park. And it was there that Gully for the first time made a sound of affection and recognition that was unmistakable.

Mulvaney quickly opened the box, and Gully went straight for a pocket-marked hoodlum, uttering rasping cries of macabre love. The low-life shot at the bird. Mike shot back and caught the tough's gun arm neatly.

The crook's name turned out to be Acklin. When they offered to put the first mil in the coll with him, he confessed. Acklin didn't deny that he was the gull's first boy friend, but Gully wanted no more of him after that shot. Now it was Mike, and Mike only with Gully—so much so that Mike blushed and squirmed when she rubbed against his leg like a cat in the squad room. Gully.

Quilts and Comforters

Beautifully made turned out to be Acklin. When they offered to put the first mil in the coll with him, he confessed. Acklin didn't deny that he was the gull's first boy friend, but Gully wanted no more of him after that shot. Now it was Mike, and Mike only with Gully—so much so that Mike blushed and squirmed when she rubbed against his leg like a cat in the squad room. Gully.

evidently, was no gal to go on singing. "My Man" after her man had done her wrong. When it was all over the captain called Mulvaney into his private office.

"So that," Mike's superior said, "was why you kept the shipboard card all this time, lugging it around to joints. I was beginning to think you was nuts."

Mulvaney explained: "You see, sir, after the robbery I took the gull to a vet to examine its wing. The wing, he said, had been broken a long time before that day. So I figures no gull with a busted wing could flow to State and Madison. I dopes it that some guy brought it there, knowin' that at the busiest corner in the world the biggest gal ever seen walkin' around would cause enough excitement to jam up everything—so's while I untangle the crowd and catch the bird the guy can pull his daylight crash. And when I seen how tough the gull is I figures no guy could get it there quiet unless the bird was plenty friendly with him. So I starts checkin' crooks systematic."

One way or another, Mulvaney it was nice work. I shall report you for promotion at once."

"Thanks, sir," Mulvaney saluted and went out. Straight to his room. By this time, he knew, it was in all the papers how he'd tracked down the perpetrator of the daring daylight robbery on State Street; how he'd got the five grand from the Jewdew Association as a reward. . . . How Acklin had stayed a long time cooling off from a former job, out in the lake on a boat, and had found the gull then.

"Mike, tell me right off, before we go any further," Ellen insisted, becomes of that razor-bladed fowl.

"I'm keepin' it," Mike said firmly. "But you told me the happiest day of your life would be when you could shoot it in the head."

"Look, Ellen, I agreed to let your old lady live with us, didn't I?" Mike interposed.

"It ain't the same thing—my old lady don't bite, or scratch, or yell—much. You ain't keepin' it, and me, Mike Mulvaney."

Now look, Ellen, every guy's entitled to a pet. I don't like dogs, you know. I don't like cats—there ain't another pet in the world, except Gully, tough enough to get along with me, except you."

"Choose!" she said, in a way she'd heard it said on the radio, right before the dame must decide between the young American engineer and the seamy old German.

Dejectedly Mike went home. All the kick had gone out of his reward dog and his promotion. Mike sighed so gustily it rattled the windows. And then the phone rang. It was Ellen. She said: "Take a powder on me, will you, flat-foot?"

"Look, Ellen, I got to stick by Gully now. She's made me make the pinch of my career."

"O.K. I thought it over. You're a right guy, at that. I'll be gullible, but my mother won't. She doesn't want to live with us if you got the gull. She's gonna live with my brother."

Mike went out on the back porch. Gully, sunning herself, said affectionately: "Awk."

"Mike" went to the phone. Called that ritz new pet shop on the Gold Coast. This is Mike Mulvaney, police sergeant. What's the most expensive fish you got?

"Expensive" is a silent-voiced male clerk echoed. Mike could almost see his eyebrows lift. "Well, you got something really distinctive, we have just received some superior specimens of the crenellated-tailed Freshwater Sea Monster."

The sales rep said now with veneration. "The males are very expensive; the females less so."

"Sounds brothly," Mike told him. "And, me twenty pounds, males and females mixed."

"Pounds!" the clerk echoed. "Cranks!" And then there was a pause at the other end of the wire as if the poor dear had swooned.

Vegetable Oil Plant

Project For The Utilization Of Farm Products

Contract for the erection of a vegetable oil plant in Saskatchewan as a first mil in the \$2,000,000 Saskatchewan Wheat Pool project for the utilization of farm products, has been awarded to Smith Brothers and Wilson, Saskatchewan contractors.

The plant, to be located on a 21-acre site in Saskatchewan's industrial sector, will be the start in the wheat pool's plan which envisions the production of a 1,000-barrel modern flour mill, a glycol plant, a factory for making starch, glucose and syrup from wheat and a 500,000-bushel grain storage elevator.

DESTROYED BY JAPS

The Soo Line came by, woke him, and as he sleepily jumped up he was struck, and got a fractured skull, and lacerations. . . . Twenty years ago, Mrs. Harold Barnes of Campbellton, N.B., gave her husband a wedding present, a pair of cuff links. He promptly lost them in a cucumber patch. The other day a sister-in-law went out to get a cucumber in same patch, and picked up the links not even tarnished. . . . A fire truck careening down Columbia St. in Kamloops, B.C., lost its muffler, back-fired, grazed the tar-surfaced street, and it had to put out the fire. . . . Lilla Nease, Belmont House, Toronto, submitted a poem to the Picton Gazette, which she wrote 50 years ago. It was accepted, printed and "brought much happiness to an old woman," as she wrote.

♦ Where there's a will, there's a way. Fire Chief Venables and members of the department at Fort Albert, B.C., have constructed of such items as a piece of board and some gas pipe, a piece of most advanced resuscitation equipment. "It has proved itself far more efficient for reviving drowned or shocked persons than any of the older manual methods," says the West Coast Advertiser.

♦ In Kentville, N.S., a group of citizens met to discuss seriously matter of breaking down of discipline in schools. Said one of them, Father J. D. Durey: "There is a tendency on the part of the home today to think the school takes the place entirely of a child's education. Parents do not realize the responsibility that theirs. The same applies to the church. Unless the home realizes its responsibility and tries to carry out its duties, the school and the church will fail."

♦ Post-war small industries are bestirring. We read where the Pembina Co-op. Cannery, Ltd., at Rhineland Village in Manitoba, is rarin' to go with machinery worth \$24,000 empty cans from Continental Can Co. arrived. They plan to can all of 40 acres of hybrid sweet corn; later in the season pork and beans, chow-chow and other meats and for future seasons in the list are peas, green and wax beans, beans, asparagus, carrots and tomatoes. They will also attempt to process soups so popular among people of that district.

♦ And apropos the above item the Morden (Man.) Times says: "Too long has rural Canada been the neglected child who paid humble homage to big industry located in the metropolitan areas. The infant has grown not only in stature but in wisdom and is now questioning the right of larger centers to corner all industry. Rural communities throughout the west are endeavoring to promote small industry development in the towns of the prairie, and with some success."

♦ Four times a day, for the past 40 years the whistle at the MacEwan Milling Co. Ltd. in Edmonton, Alta., has called the townfolk to their various tasks. On the afternoon of Aug. 27, following the fund-raising drive, MacEwan's 40-year-old founder of the mill, it was blown for the last time by W. J. Kadlec, who has pulled the cord for 27 years.

Seed To Russia

Production Of Alfalfa Seed Developing At Hudson Bay Junction

An important industry involving the production of alfalfa seed is developing at Hudson Bay Junction, according to A. G. Sinclair, district supervisor, department of Colonization and Agriculture, Canadian National Railways.

Mr. Sinclair recently visited the area and states that three carloads of alfalfa seed were shipped direct from Hudson Bay Junction to Moscow, returning the local growers \$66,000.

SPECIAL BOARD

To Handle Food Supplies For Export, Principally To Britain

One of the wartime boards, the Special Products Board, established on April 15, 1941, has been a quiet, yet efficient organization in connection with food supplies for export, principally to Britain.

The purpose of the Board as originally set up was to regulate the export of any product of agriculture processed or unprocessed, except bacon or dairy products, pursuant to agreements made between the Government of Canada and the United Kingdom. Its powers, however, were extended by Order in Council passed March 20, 1942, to include agreements with any Government in the British Empire or of any nation allied with Great Britain at the war.

The work of the Board is divided into five sections, namely, Poultry Products, Fruit and Vegetables, Flax Fibre, Field and Vegetable Seeds and Certified Seed Potatoes. Each section has its own manager.

During the 12 months ended March 31, 1945, shipments of poultry products by the Board to the British Ministry of Food included: 28,883,706 lb. of dried egg powder, the equivalent of about 86,651,000 dozen shell eggs; 2,935,030 dozen shell eggs; and 1,973,989 lb. of dressed poultry. Dressed poultry shipments to the United States Government in the 12 months totalled 23,998,681 lb.

Millions of pounds of dehydrated vegetables, 691,830 barrels of fresh apples, 6,621,846 pounds of flax fibre, millions of pounds of field crop and vegetable seeds were shipped to Britain and many thousands of bushels of certified seed potatoes were exported in the period April 1, 1944 and March 31, 1945, to France, Uruguay, Cuba, South Africa, Venezuela, and the Dominion Republic.

The total value of business done by the Board since it was established runs into many millions of dollars. The members of the Board are officials of the Dominion Departments of Agriculture and Trade and Commerce.

War-time Guests

Many British Children Will Soon Enjoy Being At Home

The return home of a number of British children who were war-time guests in Canada and the United States has been a source of reported emotion that on the surface is definitely flattering to this continent. Yet it would be a mistake to accept this as anything but superficial and temporary, or to fail to try and appreciate the deeper fundamentals of trans-Atlantic relations developed by the five-year visits of these young people.

The British children will not forget the graciousness of hospitality unconditionally given. But the majority of them are not likely to have very long for the North American amenities still unobtainable in Britain. Nor, probably, will many of them persevere in current ambitions to settle in this continent. Five years from now desires largely engendered by dismay at the forcible snapping of five-year-old ties will seem impracticable for a variety of new reasons.

In any event, Britain needs its youth for the long reconstruction years ahead. That need is a challenge that few of them will want to ignore. And whether they ever return here or not these wartime guests will have a very special privilege and a particular duty. It will be their to interpret to their relatives and friends back home the peoples of this continent to Britain; and of explaining Britain to the friends they have left here—Montreal Gazette.

This Week's Pattern

4586
S.M.L.

Can be made from 4 1/2 yds. of fabric

By ANNE ADAMS

Gaily and stylish in an apron for misses and women. Pattern 4586 can be made from little fabric. . . . even from a yard of material.

Pattern 4586 comes in sizes small (32-34), medium (36-38) and large (40-42). Small size requires 1 1/2 yds. 36-inch material.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this pattern. Write plainly Size, Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Chicago, or to The Sewing Union, 175 McDermott Ave. E., Winnipeg, Man.

India has been linked with China by telephone and telegraph, for the first time in history. A pole-line—approximately 1,700 miles long—has been set up from Calcutta to Kunming. China before completes the vast telephone system extending from Karachi, through Burma, into China.

**The Bacon Market**

Canada Must Retain The Market

Enjoyed During The War

The people have long been accustomed to regarding Danish bacon as the finest, and if Denmark combines token shipments with an aggressive publicity campaign, it may make considerable headway in the market now enjoyed by Canada. It is possible for Canada to retain a dominant position in that market, but in order to do so we must let the market know the truth about the conditions imposed upon Canadian exporters by the war.

Canadian bacon shipped to Britain during the war years has not been of high quality, and it is unlikely that the quality will be improved until better transportation facilities are available. Canadian bacon industry was expanded too rapidly; volume was the primary consideration. For a while fat was almost an equally important requirement; Britain's greatest need was food and fat. There was no time for concentration on a quality product, nor would such a product have survived wartime transport conditions. The British government expressly requested the Canadian industry to lower its standards in order to meet current conditions. The request was complied with; it was a matter of war economics and not one of profit. As a matter of fact, a great deal of the bacon sent to Great Britain since 1940 has been an outright gift, particularly acknowledging the gallant fight waged by its people against a common enemy.

The people of Britain should be told these things early and often, more especially since the re-appearance there of a mild-cured quality product which once was high in public favor. If we keep reminding Britons often enough and emphatically enough, we should be able to retain a portion of the present market until our bacon industry is reorganized to produce a higher quality product, and more rapid ocean transportation will allow us to ship in competition with a country only a few hours from Britain. Unless all these things are done, Canada runs the risk of losing a great export market, a loss which will directly affect at least a quarter of a million people.

Loans To Farmers

First Million Made By Chartered Banks Under New Act

D. M. McRae, Administrator of the Farm Improvement Loans Act, has announced that the first million dollars in loans has been made by the chartered banks to farmers under this new Dominion legislation.

Loans for water supply dug-outs in Alberta, pre-fabricated houses in Saskatchewan, and tobacco kilns in Ontario, are illustrative of the wide variety of uses which farmers are making of this Act.

While the greatest number of loans have been made by banks so far for the purchase of farm implements, money for the construction, repair and improvement of buildings are in demand and show every indication that they will be made in greater numbers as soon as material and labour become more generally available.

Course For Farmers

University of Saskatchewan Is Offering a Two-Year Course

The University of Saskatchewan is offering to young farmers a two-year practical course in agriculture, highlighted by courses in crop production, farm management, breeding, dairying, feeding of livestock, and building construction, officials of the College of Agriculture have announced. To be admitted to the school students must be at least 17 years of age, have a grade 8 education, and have lived one year on a farm. Scholarships will be offered.

Classes will be opened October 31, 1945, will close March 23, 1946. Inquiries should be sent to The Dean, College of Agriculture, University of Saskatchewan, Saskatoon.

New Cotton Cloth

Developed In New Orleans Will Resist Mildew And Rot

Newsweek says the Southern research laboratory of the Department of Agriculture in New Orleans has developed an acetylated cotton cloth which resists rot and mildew. Samples of cloth and thread treated with the preservative remained buried in soil beds for six months to a year with little loss of strength; ordinary cotton cloth completely disintegrated within a week. Sandbags of the treated material were still intact after two years in the open. The new process does not cause discoloration, odor, or stickiness, and is non-toxic.

When taken in Fats Goering was wearing the grand cross of the Knight's cross of the Iron cross. He said that the yellow double cross raised to the third power?

Born — To Mr. and Mrs. Edward Davis on Monday, Sept. 24th in the Cereal Hospital, a daughter.

Mrs. L. Thomas, son and daughter moved to town last week. Mrs. Thomas will teach in the Primery room.

BIG SNOW STORM

After a long spell of good harvest weather, it took a sudden change last week end, the rain turned to snow Saturday morning and by night, the wind had made the roads almost impassible by Sunday morning, the country looked more like December than September. The highway east of Cereal was blocked with heavy drifts which today (Wednesday) is difficult to get through. Most of the grain in the Chinook district is harvested while there is considerable crop standing further east this will be hard to cut as the snow was very heavy with moisture and it is very badly lodged, however the moisture was very badly needed and will be of great benefit to the land.

OBITUARY

MR. EVAN JONES ELLIS
Evan Jones Ellis aged 80 years, passed away at the Wetaskiwin hospital early Thursday morning August 30, after a lingering illness. Deceased was born in North Wales on January 29th, 1865. He came to Canada in 1907 and lived for a short time in Calgary, before settling on a farm at Chinook, Alberta, where he resided until seven years ago when he came with his wife to Wetaskiwin to live. In January of this year his wife predeceased him. Funeral services conducted by the Rev. A. Willis Cann were held at the Campbell Funeral Chapel Friday. Interment took place in the Wetaskiwin Cemetery.

Men, Women Over 40 Feel Weak, Worn, Old?

Want Normal Pep, Vin, Vitality?
Does weak, run-down, exhausted condition make you feel aged and old? Try Dr. Cass' **Golden** health tonic, stimulates, often needed after long periods of overwork, depression, illness, etc. Helps you get normal pep, vim, vitality. Inexpensive. See Cass' Tonic. Tastes very fine. For sale at all good drug stores everywhere.

Your co-operative gets the best possible results for you no matter what you are selling.

Volume talk.
Put your grain through your Alberta Pool elevator.

MEN FROM THE ARMED FORCES FOR FARMING

Any personnel in the Armed Services, wishing to be released for farm work at any period of the year, should now be advised to—

- Apply to their Commanding Officer for release for farm work, stating past farm experience, giving reasons for request.
- Give location, type and size of farm, wherever possible.
- If possible, submit a letter from a parent or former farm employer and a letter from municipal or other official in home locality, indicating need for services.

Agricultural Labour Survey Committees have been set up by the Federal Department of Labour, to co-operate with the Armed Services in the release of men for farm work. These Committees represent the Provincial Department of Agriculture, the Armed Services and the National Employment Service. They are prepared to advise farmers or Service personnel on any problems concerning such releases. For further information write your Agricultural Labour Survey Committee, care of Mobilization Registrar, at Charlottetown, Halifax, St. John, Quebec, Montreal, Kingston, Toronto, London, Port Arthur, Winnipeg, Regina, Edmonton, or Vancouver.

DEPARTMENT OF LABOUR

HUMPHREY MITCHELL, Minister of Labour (L.B.-W-60 52)
A. MacNAMARA, Deputy Minister

Canadians are lucky. So far we've prevented inflation and avoided deflation.

It's not been just good luck. Your support—everybody's support—of price ceilings, rationing and other controls alone has made it possible.

BUT NOW COMES THE REAL TESTING TIME.

The danger of inflation and its black shadow, deflation, will last as long as goods are scarce and insufficient to meet demands.

With the war over and plenty of money in our pockets it's easy to overlook the danger.

It's easy to think that paying just a little more to get something we want is unimportant now.

It's easy to think that what you do can't hurt—and to forget that careless, extravagant buying is a sure way to help a general rise in prices.

That's how inflation gets going.

BUT INFLATION IS ALWAYS FOLLOWED BY DEFLATION.

And deflation brings cancelled orders, bankrupt businesses, mortgage foreclosures, unemployment and distress—distress you can't avoid.

Until industry gets back to normal, price ceilings, rationing and other controls are our safeguard.

- SO—** Keep on watching your buying. Don't rush to buy scarce goods. Keep on saving your money. Put it into Victory bonds and War Savings certificates. Keep on supporting wage and price controls, and rationing. Keep on fighting inflation and its black shadow... deflation.

This advertisement is one of a series being issued by the Government of Canada to emphasize the importance of preventing a further increase in the cost of living now and deflation and unemployment later.
